

INDOOR PROJECT

INDOOR

Droni e Trapianto

INDOOR Project (usINg Drones fOr Organ tRansportation) has been developed thanks to the collaboration with various partners, in particular; Università degli studi di Torino, Politecnico di Torino, Centro Regionale Trapianti, Fondazione DOT Onlus, Azienda Ospedaliera Universitaria Città della Salute e delle Scienze di Torino and PROS3 company.

The aim of this project is to set up a series of experiments for the use of Remotely Piloted Aircraft Systems in the field of transplantation medicine, with a view to envisaging scenarios that combine greater effectiveness and cost reduction. The project will allow the study, development and implementation of a vision for the future of the transport of medical equipment, with a focus on transplant medicine.
